ADOPT A HYDRANT

Claim responsibility for shoveling out a fire hydrant after it snows.

KINOPISK.RU

problem: we don't
work together very well

Why?

...different **languages**

...different **cultures**

...different **political
contexts**

**Creating something new
is totally awesome**

**Creating something useful
is even more awesome**

...and it feels great when
someone redeploys
your project

premise:

we can be more **effective**
& **efficient** by **sharing**
projects across borders

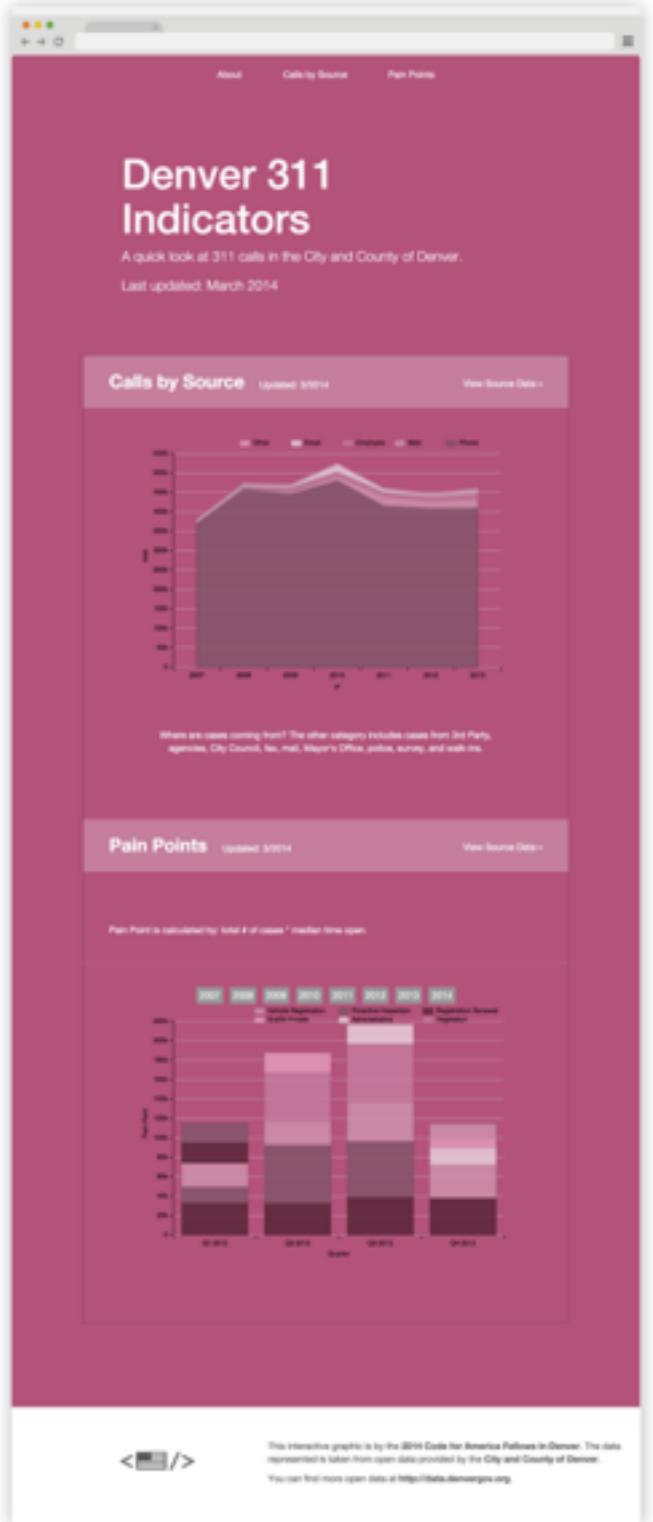

Ok, let's see
some projects

recent projects from
code for america

Plan better transit.

Visual, easy to use, and powered by data.

Try Transitmix Pro

[or learn more](#)

TRANSITMIX PRO

- Sketch routes rapidly, set service windows, and see live cost calculations.
- Import routes via GTFS, edit visually, and export to GTFS.
- Overlay critical geospatial data such as population and jobs.
- Entirely web-based. Share maps just by sending a link.

Get Transitmix Pro for your city:

Click that hood

a couple
quick thoughts

Code for Hamburg has been very successful at

- Explaining the value of data by **visualizing open data** and mapping data
- **Empowering people** to be more active participants in civics by working with data
- **Sharing interesting information** about the city that comes from open data

Open Data

In order to make **better digital experiences** we need access to **data**.

**Open data is a tactic, that helps us
achieve our goals**

open data is a **tool** that can help us use
tech to address **real world problems**

four ideas for 2015

- **Focus on users, not data:** Data is most value when it's relevant to people. Instead of starting with available data, start with user's needs and find apps or data that can be used to help.
- **Plan for redeployment:** when you're creating a new project, plan for it to be redeployed by other OK Labs
- **Redeploy other people's projects:** For every new project that you start, redeploy 3 projects from other Labs. e.g. *Click that hood & Finda*.
- **Be an amateur:** Don't bother making good apps until you know they're useful. eg *Golden Ticket & Cute Pets*

HAVE FUN
(things on bike lanes)
